

Which Students Must Be Assessed and When?

General Information

When Should Students be Assessed?

- At the end of the program or as close as possible to the end
- When they have completed coursework covering all of the program standards
- When student leaves or completes the program

Which Students must be Assessed?

- Secondary CTE students who have at least reached concentrator status, but are as close to the end of the program as possible
- Who is a concentrator?
 - A student who has completed courses with a 2.0 grade or better that covers seven or more segments

Remember:

- ✓ A CTE **program** is defined as a *sequence of courses*
- ✓ Students enroll in “**course sections**” which are uniquely defined by:
 - Time of year (Fall Semester, 1st Trimester, 1st Quarter, etc.)
 - Time of day (1st hour, 1st period, 1st block, etc.)

Minutes per week (example: instruction provided for a 2 hour block 5 days per week=600 minutes per week)

- Number of Weeks (example: 1 semester=18 weeks)
 - Instructor
 - Content (defined by **standards** which have been grouped into **segments**)
- A CTE **concentrator** is a student who has completed courses (sections) covering seven or more segments

A student will be identified as a program completer, concentrator, or neither based on his/her enrollment in, and successful completion of, course sections:

- To be identified as a completer the student will have completed, with a grade of 2.0 or better, course sections which covered all 12 segments (and taken the state technical skill assessment, where applicable)
- To be identified as a concentrator, the student will have completed, with a grade of 2.0 or better, course sections covering seven or more segments
- Students who have completed course sections covering fewer than seven segments will not be identified as a concentrator until they receive a grade of 2.0 or better in the next course section in the program.
